## **Granite Pavers**

One of the most elegant natural stones for residential and commercial paving applications is granite. In fact, the durability and versatility of the granite make it the contractors' primary choice for landscaping. One of the best properties of granite is its permanence. You will find this natural stone in multiple ancient monuments and structures. Many buildings featuring the granite pavers have stood the test of the time. The world's oldest and popular buildings are made of granite pavers. You will spot the granite pavers in the Egyptian, Greek, and Roman architecture.

Add to its qualities the easy maintenance. You only need to give the granite pavers a wipe to clean its surface. Another specialty of granite is that it doesn't lose its color and shine for many years. The granite pavers look the same even after years of heavy use. Even if you expose these pavers to extreme temperatures and heavy traffic, rest assured that they will not lose their elegance. It wouldn't be wrong to say that the landscape made of granite has the potential to remain intact for good. All it needs is the basic maintenance and regular sealing.

### **Granite in Different Colors and Types**

The material is available in different types. You could choose regular or irregular granite pavers. It all comes down to your specific requirements and the landscape. If you would like to achieve a sleek and sophisticated design, then tumbled granite pavers will make a perfect choice. If you want to lay these pavers on the pool deck and patio, then you must consider the lighter shades. That's because dark hues absorb heat. Granite tiles featuring dark tones can get hot to touch. So, consider the dark palettes if you are installing these pavers in your exteriors.

You will find granite in pink, green, gray, blue, silver, black, crimson, white, yellow, and other hues. It is available in both dark and light tones. Besides that, the material is sold in multiple finishes that are designed to fit different landscapes. You get to choose from honed, polished, tumbled, and natural granite pavers. Half-course square granite pavers look awesome in your exteriors. You can also choose granite cobblestones to give a natural and organic feel to your home.

### **Use Granite Pavers to Enhance your Landscape**

Granite happens to be one of the royal natural stones that can boost the curb appeal of your home. You can lay granite pavers in different patterns to create your desired aesthetics. The most common option is the square-edged granite pavers that are used for a uniform paving pattern. You can also create a geometric pattern with granite pavers.

Mostly, homeowners choose the large blocks of granite for interior flooring, while small slabs of this natural stone can be used to design the exterior. The infinite variety of colors, shapes, textures, and sizes make granite an ideal choice for residential and commercial applications. It gives you a great opportunity to customize your space. The original granite tiles can help you design a luxurious and elegant landscape.

### **Granite Outdoor Pavers**

Nowadays, the entertainment areas and landscape have become quite trending in the residential properties. People install swimming pools in the decks to enhance the curb appeal of their property. The reasons why granite is popular in the outdoor and indoor areas are its durability, versatility, hard-wearing nature, and elegant look.

This natural stone has the ability to resist even the harshest weather elements. Granite pavers last for years. They look brand-new even after years of frequent use. Below we have listed the common places you could use granite pavers.

### **Walkways**

Granite is available in a countless variety of color palettes. It also has multiple textures and finishes that make it a good option for walkways. You can use split-face and honed granite tiles to create a stunning walkway that combines your outdoor with the interiors. Granite stepping stones are available in the Australian stone markets. You can use these stones to make your garden look warm and inviting.

### **Walls**

The applications of granite are no longer confined to the interior kitchen countertops and bathrooms. In fact, more and more homeowners have started to consider granite wall cladding tiles to decorate their façade walls and add drama to their living space. Granite wall cladding is quite common around the fireplace, shower walls, and façade. It helps you create a stunning

outdoor landscape without breaking your budget. If you would like to keep the look minimal, then honed granite tiles will make a decent option for your exterior walls.

For a dramatic look, combine different colors and shapes of granite tiles and design a mosaic wall. Granite is available in different cuts and colors. You could choose dark tones for flooring and light palettes for wall cladding. It will help create a perfect landscape. Whether you use this stone for interior or exterior walls, it will boost the curb appeal of your home. Besides that, it creates a focal point that draws the attention of your guests.

### **Patios**

As long as you have installed the stones properly, granite patio pavers do not need a lot of maintenance. You can add depth to your patio by combining different colors and shapes of granite and assemble them on the ground in a crazy-paving pattern. Granite French pavers are also quite popular in traditional-style homes. You can create a geometry pattern, which is quite trending these days. You don't necessarily have to mix and match the granite slabs. If you would like to create a consistent pattern, then choose the same-sized granite pavers.

### **Pool Deck**

Another application of granite pavers is the pool deck. If you have a swimming pool on the deck or patio, then granite pavers can help you give a definition to space by creating a secure and sharp edge around the pool. Not only is pool coping important for safety reasons, but it helps improve the aesthetics of your space. The granite looks stunning on the pool decks. However, the polished and tumbled granite are slippery. Make sure you choose the natural granite pavers around the pool.
